

CALIFORNIA ENERGY COMMISSION

1516 NINTH STREET
SACRAMENTO, CA 95814-5512

May 16, 2001

Mr. Tom Cameron, Project Director
Blythe Energy, LLC
N16 W23217 Stone Ridge Drive, Suite 100
Waukesha, WI 53188

SUBJECT: Approval of Request to Change Condition AQ-17 to Require Surrender of ERCs Prior to Commercial Operation, for the Blythe Energy Project (99-AFC-8C)

Dear Mr. Cameron:

California Energy Commission (Energy Commission) staff have reviewed your petition of April 16, 2001, to change the requirement in condition AQ-17 of the Blythe Energy Project (BEP) Commission Decision to surrender the emission reduction credits (ERCs) to the Mojave Desert Air Quality Management District (AQMD) prior to the start of construction. You have requested that the condition be changed to require the surrender of ERC's prior to the start of project operation. Your reasons for this request are that first, the ERC's are not needed until the project begins operating, because until then there are no emissions to offset. Second, requiring you to surrender the offsets prior to construction removes your ability to substitute other acceptable ERCs prior to operation that might be preferable over the current ERC's that Blythe Energy controls. The approved change to condition AQ-17 is limited strictly to the timing of the surrender of the ERCs, and not to any change in the ERCs which have already been reviewed and approved. Any change to the offset package and associated ERCs which have been identified and approved must be submitted to the Compliance Project Manager (CPM) for review and approval prior to the surrender of any ERCs.

As directed by Governor's Executive Order D-25-01, concerning post-certification amendments, we have expedited review of this proposed project modification because statutes and implementing regulations that normally apply to review and approval of this amendment have been suspended. Energy Commission staff have concluded that this modification has no potential for adverse environmental or public health and safety impacts. Therefore, your request is approved.

The following is the revised language of Condition of Certification of AQ-17 that specifies that the required ERC's for the Blythe Energy Project must be surrendered to the Mojave Desert AQMD prior to the first firing of the combustion turbines (new wording shown double underlined, deleted wording shown with strikeout).

AQ-17 The project owner must surrender to the District sufficient valid Emission Reduction Credits for the turbines before the first firing of a combustion turbine ~~start of construction of any part of the project for which this equipment is~~

~~intended to be used.~~ In accordance with Regulation XIII the operator shall obtain 202 tons of NOx and 103 tons of PM10124 offsets (VOC ERCs from SCAQMD may be substituted for NOx ERCs at a rate of 1.6:1).

Verification: The project owner must submit all ERC documentation to the District and the CPM no later than 30 days prior to the first firing of a combustion turbine start of construction.

The Mojave Desert AQMD approved this change in their District permit as communicated in their letter of March 13, 2001.

A copy of this letter will be posted on the Energy's Commission website at www.energy.ca.gov, and we will file a California Environmental Quality Act Notice of Exemption with the State Clearinghouse.

If you have any questions, please contact Steve Munro, Compliance Project Manager, at (916) 654-3936, or by e-mail at smunro@energy.state.ca.us.

Sincerely,

ROBERT L. THERKELSEN, Deputy Director
Systems Assessment and
Facilities Siting
